Trust Problems

- Can't trust the content.
- Can't trust the browser.
- Can't trust the platform.

Trust Problems

- Can't trust the content.
- Can't trust the browser.
- Can't trust the platform.
- Can't trust use of tokens.

Trust Problems

- Can't trust the content.
- Can't trust the browser.
- Can't trust the platform.
- Can't trust use of tokens.
- Can we even trust the tokens themselves?

Trust Problems

- Can't trust the content.
- Can't trust the browser.
- Can't trust the platform.
- Can't trust use of tokens.
- Can we even trust the tokens themselves?
- Can we trust the big new TokenOS?

What to Do?

- Orange Book implemented an inappropriate security model.
  - Doesn't protect the right things.
- We need a new security model.
- We need products that implement this model..

What to Do?

- Orange Book implemented an inappropriate security model.
  - Doesn't protect the right things.
- We need a new security model.
- We need products that implement this model..
- ... and we need customers who will buy it

If We Don't…

- The lawyers will come!
