Lab 1 Submission Guidelines

- Please fill in this shared Google sheet with your team membership. This should be done by next Tuesday (Sep. 18).
- The entry for Lab 1 submission has been created on Coursework (due Sep. 21). Only one submission is required for each team and you should only submit after your team has been created on Coursework - so that one submission will be counted for all members. Your team should be created by TAs by Sep. 18 given that you have filled out the Google sheet on time.
- You should submit a lab1_UNI1_UNI2.tar.gz file which contains a folder named lab1_UNI1_UNI2 and has the following structure (replace UNI with your actual UNI):
  - lab1_UNI1_UNI2/
    - timed_out_and_back.py: the main python script which starts the turtlebot controller
    - (Optional) other python files that timed_out_and_back.py depends on
    - README.md: a Markdown README file with the following sections:
      - Usage: how to run the main script. If you have other python files, you should describe their functionalities.
      - Method: a brief description of your methods
      - Video: a link to the Youtube video of a working demo of Lab 1
      - Others: anything else you would like to include
- Violation of these submission instructions will result in point deduction.

NOTE:
To create the lab1_UNI1_UNI2.tar.gz file from folder lab1_UNI1_UNI2, run the following command:

tar -zcvf lab1_UNI1_UNI2.tar.gz lab1_UNI1_UNI2
