Lab 1 Submission Guidelines

- Please fill in this shared Google sheet with your team membership. This should be done by next Wednesday (Sep. 18).
- **Only one submission is required for each team** and you should only submit after your team has been created on Coursework - so that one submission will be counted for all members. Your team should be created by TAs by Sep. 18 given that you have filled out the Google sheet on time.
- You should submit a `lab1_UNI1_UNI2.tar.gz` file which contains a folder named `lab1_UNI1_UNI2` and has the following structure (replace UNI with your actual UNI):
  - `lab1_UNI1_UNI2/`
    - `timed_out_and_back.py`: the main python script which starts the turtlebot controller
    - (Optional) other python files that `timed_out_and_back.py` depends on
    - `README.md`: a Markdown README file with the following sections:
      - Usage: how to run the main script. If you have other python files, you should describe their functionalities.
      - Method: a brief description of your methods
      - Video: a link to the Youtube video of a working demo of Lab 1
      - Others: anything else you would like to include
- **Violation of these submission instructions will result in point deduction.**

**NOTE:**
To create the `lab1_UNI1_UNI2.tar.gz` file from folder `lab1_UNI1_UNI2`, run the following command:
```
tar -zcvf lab1_UNI1_UNI2.tar.gz lab1_UNI1_UNI2
```
