

Solkam

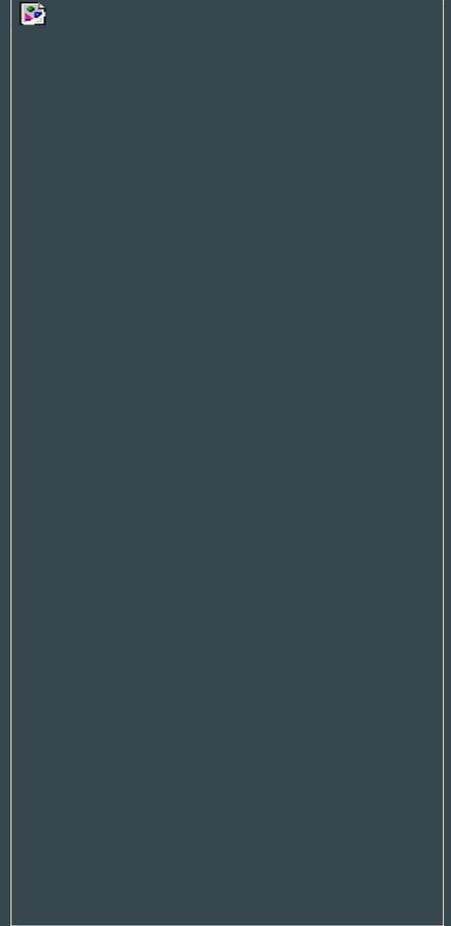

...

Language Goals

- Easily readable language
- Syntax based on Python
- General purpose
- Object Oriented

Compiler

- Scolkam files end in .sco extension
- End language is LLVM

Language Basics

-Types: Float, Int, Str, Bool, Tuple, None

-Operators: + - * / > < = != == <= >= and not

-Control Flow: for, while, if

-No { }, use def and end

-Unlike Python, no indentation/spacing requirements

```
def int bar(int a, bool b, int c):  
    return a + c  
end
```

Testing

- First test based on Micro-C compiler test suite
- After that built on features defined in LRM
- Started with Unit tests, worked up to Integration testing

DEMO & Lessons Learned
